

CONSUMABLE SOLUTIONS

FITRATION | SEPARATION | PURIFICATION

A night-time photograph of the Dubai skyline, featuring the Burj Khalifa and other skyscrapers illuminated against a dark blue sky. The buildings are reflected in the water in the foreground. A semi-transparent brown box is overlaid on the left side of the image, containing white text.

SECORP Global Solutions, strategically headquartered in the Kingdom of Bahrain with direct facilities in US, UK, Saudi Arabia and Malaysia and indirect operations through our agents in most of GCC and SEA countries.

We are a multi-platform solution provider with global reach. Our strategic positioning give us quick and direct access to Europe, GCC and South East Asia region, where we service a wide range of clientele.

SECORP Adding Value to Your Filtration

Manufacturers, distributes and resells a wide range of consumables for liquid and gas filtration.

Product range includes depth, pleated, membrane, bag filters , standard and be-spoke filter housings and ancillary products.

In-house design, engineering and manufacturing capabilities allows us to offer complete solutions either new build or to cater for existing expansion .

Engage with our clients at all levels to understand their requirement and deliver a custom made solution accordingly.

Partners with top international known brands to compliment our product range in order to cater to most if not all of our target client requirements.

Whether it is SECORP or our partners brand that we supply, we ensure that all the stringent requirement by our clients area met. All our products are manufactured in accordance with ISO 9001 Quality Management System .

Our Consumable Product Range

We supply a wide range of consumables using different materials that caters to various applications. Our objective is to deliver high efficiency, reliable and cost effective solutions.

Actively servicing clients in various market sectors such as;

- **Offshore Exploration & Production**
- **Petrochemical & Refinery**
- **Power Generation**
- **Industrial & Manufacturing**
- **Food & Beverage**

Proven product range, used extensively in new installation as well as replacement of existing international known brands.

Coalescer Filter Cartridges

A wide variety of media with oleophobic and hydrophobic surface treatment. Designed to coalesce extremely fine liquid particles in liquid or gas streams.

Liquid aerosol removed down to $0.1\mu\text{m}$ with the high removal of liquid contaminants 1ppb and 0.01ppm downstream.

Depth Filter Cartridges

Specially designed with high compatibility media and precise density to provide the optimum solution for solid filtration in a wide range of challenging applications.

Nominal progression and absolute versions deliver retention ratings ranging from $0.1\mu\text{m}$ to $500\mu\text{m}$. Available in Wound, Melt Blown and Phenolic Impregnated Resin filters.

Pleated Filter Cartridges

Our pleated and high flow filters provide large surface area for maximum dirt holding capacity and lower initial pressure drop.

Manufactured from glass fibre, polyester fibre, or FDA approved polypropylene for wide-ranging application, retention ratings range from 0.2µm to 250µm.

This durable filter is compatible with highly aggressive solvents and chemicals, ensuring a versatile solution to filtration requirements.

Membrane Filter Cartridges

Our membrane filters are designed for use in final stage and microbial stabilisation filtration, with retention ratings from 0.05µm – 1.2µm.

Each filter is integrity testable and constructed from high performing polyethersulphone, PTFE or nylon, to withstand sterilisation temperatures.

Filter Bags

Our filter bags are available in a wide range of chemically compatible media.

Retention ratings of 0.2µm - 1000µm make them suitable for a wide range of industrial applications.

Filter Housing

With a leading in-house design team to provide solutions for bags or filter cartridges housing, we provide wide range of standard options in various materials such carbon steel, stainless steel, super duplex and others.

Able to design and manufacture in accordance ASME/U-stamp standards.

If you're looking for a more bespoke solution, we provide a fully customised manufactured options to fit your application and process.

Ask about our range of ancillaries, including integrity test units and housing accessories.

We Provide High Efficiency and Cost Effective Solutions

SECORP
Your Global Solutions Partner

1801-12

MGM : 12000 KG
TARE : 2600 KG
PAYLOAD : 9400 KG

“SECORP not only provided us with superior filters, compared to our previous supplier, but we’ve cut our costs by half. The filters service life extended by 20%, we’ve made a huge cost saving while benefiting from clean and smooth process downstream.”

**Operation Engineer,
Petronas Chemicals Group.**

“SECORP coalescers perform far exceeding our expectations, our coalescer still perform very well with very low differential pressure. The coalescers cost is very competitive and economical. We’ve made a huge saving and now we have to reschedule our changeout with an additional year.

**Maintenance Engineer,
Petronas Integrated Facilities.**
